

Technical Data Sheet RS 400 SPRAY Lubricant and detergent spray

Description

RS 400 SPRAY is special spray formulated and developed for lubrication and cleaning particularly suitable for use in textile industry.

Use / application

RS 400 SPRAY is above all suitable for the lubrication of weavers and winders and similar applications and machinery in textile industry. The extended nozzle of this product in spray allows to lubricate properly even hard-to-reach points such as weavers scissor machinery and similar applications. RS 400 SPRAY contains solvent which evaporates very fast and leaves extremely thin lubricant film. This lubricant film, due to its particularly strong anti-static properties, repels dust and loose fibers. Product does not contain CFC. Spray contains propane/butane and therefore is signed with symbol "F+" as highly flammable.

Technical Data

Viscosity at 20°C	ASTM D445	mm²/s	168
Viscosity at 50°C	ASTM D445	mm²/s	36

TECH00072 Ed. 06/19
